Welcome to The Children's Hospital at Saint Peter's University Hospital in New Brunswick, New Jersey. At Saint Peter's, our doctors and staff strive each day to offer the highest quality care to our patients. We understand that when children and their families visit a hospital, it can be confusing and overwhelming. Saint Peter's has placed our patients first and created a family-centered pediatric hospital for all your inpatient and outpatient needs. The doctors and staff at The Children's Hospital are committed to providing the best possible care in a compassionate and comforting environment for children and their families. This directory will give you a comprehensive overview and contact information for the array of services offered at The Children's Hospital. Please also visit us on the web at saintpetershcs.com/spchildrenshospital.

Adolescent Medicine

The Adolescent Medicine Division at The Children's Hospital offers a comprehensive approach to teenagers' health concerns. The Division specializes in adolescent gynecology, acne and hormonal evaluations, and ADHD in teenagers. We also provide services for obesity and eating disorders. The Division sees patients up to the age of 22.

Adolescent Medicine

732-565-5487 254 Easton Avenue New Brunswick, NJ 08901 Residency: North Shore University Hospital, Manhasset, NY Medical School: Albert Einstein College of Medicine, Bronx, NY

Pediatric Cardiology

At the Children's Hospital of Philadelphia Cardiac Center at Saint Peter's Children's Hospital, board-certified pediatric cardiologists, a nurse clinician and cardiac technologists offer comprehensive services for infants, children and young adults with all forms of acquired and congenital heart disease as well as electrical disorders of the heart. Conditions treated include heart murmurs, congestive heart failure, rheumatic fever, Kawasaki disease and arrhythmias. In addition, we perform fetal echocardiograms looking for possible congenital heart disease prior to birth.

Pediatric Critical Care

At The Children's Hospital, we know children are very special people and we have built our reputation on providing the very best care to kids. Saint Peter's eight-bed Pediatric Intensive Care Unit (PICU) gives children who are recovering from surgery or serious illness the highest level of medical care available. This special unit is staffed by pediatric intensivists and nurses who are highly trained in pediatric intensive care medicine. Together, the staff delivers excellence in bedside care and personal attention to every child who arrives at our PICU.

Developmental and Behavioral Pediatrics

The Developmental and Behavioral Pediatrics Division works in a collaborative setting utilizing a full range of clinicians including pediatric sub-specialists, mental health professionals, social workers, nutritionists, and therapists specializing in speech-language, audiology and rehabilitation. The Division provides diagnostic, medical and therapeutic services to children and young adults up to age 21 with developmental and/ or behavioral disturbances and those at risk for such disturbances. The Division also works closely with community agencies and local school districts and provides advocacy to families in need of accommodations and services.

Saint Peter's is one of only a few hospitals in New Jersey with a specialized Pediatric Emergency Department, The Dorothy B. Hersh Pediatric Emergency Department (ED). Using the latest technology and equipment developed specifically for treating children, all pediatric emergency patients are stabilized and treated in their own special area. The ED is staffed with physicians and nurses who are specially trained to care for children. The ED has toys, videos and televisions to occupy your child, and the environment is designed to soothe.

The Pediatric Endocrinology Division offers a full range of endocrine and diabetes care. The Division has state-designation as a Regional Center for Inherited Endocrine Disorders and provides testing, treatment, and education related to congenital hypothyroidism and congenital adrenal hyperplasia (CAH). The Center for Diabetes Self-Management, a comprehensive program for children with diabetes, promotes the concept of self-care through education about the disease, as well as providing the skills necessary for diabetes self-care. In both inpatient and outpatient settings, a team of pediatric nurses, dietitians, and endocrinologists helps children and their families master the necessary information and skills for living day-to-day with diabetes.

The General Pediatrics Division serves some of the most medically complex and fragile patients in Central Jersey and also offers a full array of pediatric services for children, with more than 18,000 physician and nurse visits annually. The Division is also a leader in the NJ State Vaccine for Children (VFC) program and provides over 26,000 vaccines to children each year. The General Pediatrics Division cares for children with co-morbidities ranging from autism, to the more obscure cases such as highly complex oncology cases and neurological diagnosis. The Pediatric Faculty Group (PFG) is comprised of pediatricians, nurses and technical staff who provide preventive wellness care, nurse visits and urgent care to the central New Jersey catchment area at Saint Peter's Family Health Center. Pediatricians are board certified/board eligible and provide evidence-based care to patients. The site also serves as continuity clinic for pediatric residents, who complete their training in both urgent care and well care. The General Pediatrics Division is also a member of the National Reach Out and Read (ROR) Program and has developed the How Lane Early Literacy Program utilizing the ROR model. Pediatricians and healthcare providers assess developmental milestones and encourage parents to read in both English and Spanish to help foster and nurture reading and learning from infancy through early childhood.

The Division of Pediatric Hematology/Oncology provides diagnosis and treatment to infants, children, adolescents and young adults with cancer and disorders of the blood, including sickle cell anemia, thalassemia, anemia, and bleeding disorders. The Division also offers a Multidisciplinary Vascular clinic for treatment of hemangiomas, other vascular tumors, and vascular malformations. As a full-member institution of the Children's Oncology Group, our specialists participate in the latest research, and provide cutting edge treatment of childhood cancers in collaboration with specialists from all over the world. The most current therapy is offered providing the best chance for cure. The New Visions Support Group provides peer-to-peer support for children, teens and young adults with cancer and other life-threatening diseases.

The Division of Immunology and Allergy provides comprehensive evaluation and treatment for children with allergic and immune disorders, including common allergy-related problems, such as food and pet allergies, eczema and asthma, as well as more complex and rare immunodeficiencies, such as severe combined immunodeficiency. Our Division also serves as consulting immunologists for any babies found with abnormalities by newborn Severe Combined Immuno-Deficiency (SCID) screening. Physicians also evaluate and treat patients with various allergic, rheumatologic, and immunologic disorders of childhood including pediatric asthma, atopic dermatitis (eczema), hives, hay fever, anaphylaxis, stinging insect allergy, immunodeficiency, recurrent infection, chronic cough, and illnesses which may complicate chronic allergic disease such as chronic sinusitis.

Pediatric Infectious Diseases

The Division of Pediatric Infectious Diseases offers a variety of comprehensive care to children with infectious diseases. The pediatric specialists in the Division assist in the diagnosis and management of children with a number of known or suspected infections as well as immune deficiencies. Children are commonly referred for outpatient evaluation of recurrent or prolonged infections, persistent fever, suspected immune deficiency, enlarged lymph nodes, Lyme disease, tuberculosis, pneumonia, and a wide range of childhood infections. Children with meningitis, encephalitis, bone infection, endocarditis, and a spectrum of serious or difficult-to-treat infections are usually evaluated by these specialists as inpatients in The Children's Hospital.

The Division of Inpatient Pediatric Medicine was designed to provide specialized pediatric care in the inpatient setting. At The Children's Hospital, our board certified pediatric hospitalists are dedicated to caring for hospitalized infants, children and adolescents. To ensure the optimal level of care for medically complex patients referred by their primary care physicians, many patients are assigned to the Division of Inpatient Pediatric Medicine. The inpatient specialists work closely with an array of medical and surgical sub-specialists throughout The Children's Hospital. They are also in close communication with the referring physician and ensure that they receive a detailed discharge summary.

The Level III Neonatal Intensive Care Unit (NICU) at The Children's Hospital at Saint Peter's University Hospital is part of New Jersey's first state-designated Regional Perinatal Center. Licensed for 54 bassinets, our NICU is staffed around the clock with highly trained neonatologists, neonatal nurses and nurse practitioners, neonatal respiratory therapists, a neonatal-trained pharmacist and social worker. A variety of specialty services including genetic testing, ultrasound, physical therapy, and developmental assessment are also available. Despite the high-tech treatment used in our NICU, Saint Peter's understands the importance of the love and attention only parents can give their baby. NICU parents may visit their baby at any time of the day or night and can call whenever they have questions or concerns. In addition, our NICU is fully equipped with cameras that offer parents a secure online portal to view their infant from anywhere at any time.

Pediatric Neurology

The Division of Pediatric Neurology is dedicated to offering the highest level of care to children and families afflicted by disorders of the nervous system and using both technology and compassion to treat children with severely disabling illnesses. Our pediatric neurologists care for children with a wide range of disorders including children with inborn errors of metabolism that involve the nervous system. The Pediatric Neurology Division utilizes sophisticated diagnostic techniques, including video-encephalography (EEG) monitoring, to help evaluate children with seizure disorders, epileptic and non-epileptic seizures. Some children benefit from surgery, which is guided by sophisticated brain mapping techniques. In all cases, therapy is tailored to the individual child, and options may include the full range of anti-epileptic medications, the ketogenic diet and vagus nerve stimulation. The Division is a referral program for area neurologists for the treatment of intractable seizures. Neurologists also investigate and manage cerebral palsy, developmental delay, movement disorders, chronic headache and autistic spectrum disorders.

Pediatric Sports Medicine Concussion Program

At The Children's Hospital, we provide comprehensive medical evaluations and treatment for children and young adults who have concussions caused by sports, accidents or falls. We provide expertise on sprains, overuse injuries, strains, dislocations, ligament injuries and many other sports-related injuries. Additionally, our Pediatric Concussion Program has a wide range of pediatric subspecialties available including sports medicine, social work and neurology. Neurological and diagnostic tools, including computerized cognitive testing, physical and/or occupational therapy assessment and other diagnostic tools such as MRI, are all available.

Pediatric Orthopedics

The Pediatric Orthopedics Division is a comprehensive program focused on the evaluation and treatment of musculoskeletal (bone, joint, or muscle) conditions in children. It offers a continuum of care that includes newborns, babies, toddlers, teenagers and young adults. The pediatric orthopedist focuses upon the child's musculoskeletal development, as children are faced with different problems compared to adults, since children are growing and developing, and their body's response to injuries, infections, and deformities are very different from those of an adult.

Our integrative program treats children with complex pediatric problems, and each child's care is managed by a team of medical and surgical professionals who are uniquely trained in caring for children with musculo-skeletal conditions, such as limb and spine deformities noted either in utero, at birth or later in life (clubfoot, scoliosis, limb length differences), gait abnormalities (limping), fractures, bone or joint infections and tumors. The Children's Hospital pediatric orthopedic surgeons are fellowship trained, provide a wide range of treatment options, and possess great expertise in dealing with children and treating their musculoskeletal conditions.

Medical School: New York College of Osteopathic Medicine, New York, NY

The Children's Hospital at Saint Peter's provides a wide array of pediatric surgical services including general surgery, ear, nose and throat surgery (ENT or otolaryngology), gastrointestinal surgery, ophthalmology, urology, orthopaedics, plastic surgery and neurosurgery. The pediatric surgeons utilize advanced surgical equipment and tiny video cameras to perform major procedures with just a few small incisions. These minimally invasive surgical techniques and technologies decrease healing time, helping kids get back to being kids as soon as possible.

Craniofacial & Neurosurgical Center

T: 732-745-7943

F: 732-745-1768

254 Easton Avenue, New Brunswick, NJ 08901

The Cleft Palate-Craniofacial Center was founded in 1959 to provide families with the much needed medical knowledge, technology and support which are so necessary for a child with clefting or other craniofacial differences. Our team focuses exclusively on the special needs and concerns of these families.

We pride ourselves in providing ongoing clinical correspondence to the child's primary care physician. We believe strongly that the child's primary care physician is an integral part of our team.

Our program is recognized by the American Cleft Palate-Craniofacial Association (ACPA) as a regional center providing all of the services necessary for the treatment of clefts and other craniofacial disorders.

Dorothy B. Hersh Child Protection Center

T: 732-448-1000

F: 732-745-2344

123 How Lane, New Brunswick, NJ 08901

The Dorothy B. Hersh Regional Diagnostic Treatment Center is staffed by child abuse pediatricians, pediatricians, nurse practitioners, psychologists, social workers and nursing staff with specialty training and/or experience in child abuse/neglect. The Center utilizes a wide range of pediatrics specialists including but not limited to: pediatric radiology, pediatric endocrinology, genetics, pediatric hematology, and pediatric neurology, all providing consultations as necessary. All professional disciplines work collaboratively within the framework of a multidisciplinary approach to provide timely and effective evaluations and interventions in child abuse or neglect cases. The Center has established working relationships with the Division of Child Protection and Permanency local offices, prosecutors' offices, as well as many local mental health providers, pediatricians, schools and police departments located with the seven counties that comprise the central region of the state. The Center works to provide a timely response to reports of suspected child abuse and/or neglect.

For KEEPS (For Kids Embraced and Empowered through Psychological Services)

Acute Behavioral Program

T: 732-565-5494

F: 732-846-5478

123 How Lane, New Brunswick, NJ 08901

The mission of For KEEPS is to provide high quality mental health diagnoses and intensive treatment to children who suffer from emotional and behavioral difficulties that impede their ability to function successfully in a social environment. For KEEPS is an acute partial hospitalization center for children between the ages of 5-17 years old who do not require 24-hour inpatient care, but who cannot be managed by outpatient care alone. Therapeutic services for adolescents are provided apart from services for younger children. The center provides individual and group therapy, family therapy, academic instruction in collaboration with the child's school district, medication management, discharge planning, and referral services and transportation for eligible children.

The Center for Sleep and Breathing Disorders

T: 732.937.6055

F: 732.545.4476

254 Easton Avenue, New Brunswick, NJ 08901

The Center for Sleep and Breathing Disorders at Saint Peter's University Hospital is fully accredited as a sleep disorders center by the American Academy of Sleep Medicine, recognized as one of the most important national organizations ensuring that a sleep center provider meets or exceeds the standards of sleep medicine. Our exceptional expertise and high standards ensure that children receive the most comprehensive evaluation, diagnosis and treatment of sleep disorders. Poor concentration, depression, irritability, asthma and allergies, and poor physical health can be the results of poor sleep habits. We offer comprehensive care for children and offer overnight and daytime sleep studies.
