

*Treating you better...for life.*

## Community Mobile Health Unit (732) 339-7675

When members of the community can't get to Saint Peter's University Hospital for health care, Saint Peter's takes health care into the community. Our 43-foot

health van has traveled thousands of miles throughout central New Jersey visiting schools, retirement communities, day care centers, homeless shelters, senior centers, public housing complexes, shopping centers, and corporations. We are staffed with advanced practice and registered nurses. We cover Middlesex and Somerset Counties-especially those areas where healthcare services may be limited.

Some of the services our Community Mobile Health Unit staff provides are:

- Blood sugar screenings
- HbA1c (average blood sugar level for the past 2-3 months)
- Blood pressure screenings
- Cholesterol screenings
- Osteoporosis screenings
- Skin cancer screenings
- Dermascan facial screenings
- Audio screenings
- Vision screenings
- Immunizations
- Referrals for community healthcare services
- Healthcare education
- Stroke risk assessment screenings
- Follow-up healthcare services

If you would like our Community Mobile Health Unit staff to perform health screenings for your company or to be present at an event, please call 732-339-7675. Our Community Mobile Health Unit was grant funded and we are licensed by the state of New Jersey. The van fulfills Saint Peter's mission to serve our community in a most direct way and has become a symbol of our commitment to the public.
